SUMMARY

Software Engineer specializing in scalable, high-performance mobile apps with deep ownership across Android & iOS. Experienced in complex state management, real-time systems, performance optimization, and production deployments for 8+ enterprise and consumer apps.

WORK EXPERIENCE

- **Softsensor.ai, Jaipur** Aug 2023 - Present
Software Engineer
 - Own **end-to-end development** of multiple React Native applications used in production across Android and iOS
 - Led development of **driver-facing and admin mobile apps** for a large-scale delivery management platform.
 - Architected complex workflows including **vehicle inspection, scheduling, live tracking, and AI-based damage detection**.
 - Implemented **real-time features** such as live location tracking, push notifications (FCM), and in-app updates.
 - Built **Twilio-powered in-app chat** enabling seamless communication between drivers and admins.
 - Worked closely with designers and backend engineers in Agile sprints to deliver high-quality releases on time.
- **Samsung R&D Institute, Bangalore** Sep 2021 - May 2022
Research Intern
 - Contributed to **Emotion Intelligence & Text-Based Personality Profiling** research.
 - Built and evaluated ML models (LSTM, RNN, SVM) for sentiment and personality prediction using TensorFlow.
 - Performed data preprocessing, feature extraction, training, and validation using Python.
 - Gained strong foundations in **data-driven problem solving and research workflows**.

TECHNICAL SKILLS

- ✓ **Mobile:** React Native, React Navigation, Redux, React Query, Firebase, FCM, Native Modules (iOS & Android), Kotlin, Swift
- ✓ **Languages:** JavaScript (ES6+), TypeScript, Java, SQL
- ✓ **Web:** React.js, Node.js, Express, REST APIs, MUI
- ✓ **Tools:** Git, GitHub, Xcode, Android Studio, Reactotron, Postman, JIRA

EDUCATION

- **B.E. in Computer Science** Aug 2020 - May 2023
Chandigarh University, (Mohali, Punjab - 140413)

PROJECTS

- **Delivery Management & Driver Operations App**
 - Integrated **biometric login, face recognition, and face sign-off** for secure delivery operations.
 - Enabled **live location tracking**, route mapping, and real-time updates via Firebase Cloud Messaging (FCM).
 - Implemented Twilio-based chat and in-app messaging between drivers and admins for seamless communication.
 - Built AI-driven damage detection, RBAC access control, and admin dashboard with delivery insights.
